FACULTY

MESSAGE FROM THE DEAN

The beginning of a new decade provides opportunities to reflect on what one hopes to accomplish as an individual and what one sees the next ten years holding for one's profession. I have many aspirations for the Faculty of Nursing which I realize will only be achieved through the efforts of the faculty and students working together. I hope that a PhD in Nursing will be offered early in the decade, that a professional masters degree will soon join the master of science degree and that we will have some creative ways for registered nurse students to complete their requirements for a baccalaureate degree. I hope that the new undergraduate curriculum will be introduced early in the decade and will provide the framework for an education that will serve graduates well into the 21st century.

All of these developments require us to be very clear about what we believe nursing is about: Sustaining individuals through crises in their lives, conveying to them convincingly that they are not alone in facing these crises, having superb skills to comfort, to reassure, to acknowledge loss, grief, disappointment as well as relief, joy and triumph over life-threatening diseases, providing information and real choices about how to manage health and illness situations, and having the ability to convince individuals and collectives that a healthy community is worth working for. Nursing is about all of this and more. That's what makes it so exciting and rewarding. The decade of the 90's will give all of new opportunities to expand what we know and to take risks in new situations. I'm looking forward to it and I hope each one of you is too.

Dorothy M. Pringle
Dean

FROM THE CHAIRPERSON

I am pleased and proud to congratulate the Class of 1990 on your graduation from the Faculty of Nursing. As a class I have known well through all four years of your program, you are special to me. As shown in these pages, you have been a very active, very involved group. I hope you maintain your good humour, creativity and commitment during many years in nursing.

On behalf of all the undergraduate faculty members I wish you well as you move now into your professional careers.

THE RETURN OF SNEEZLES

SNEEZLES last appearance at the Faculty of Nursing was in 1971, but 19 years later it seemed that SNEEZLES was to make a reappearance (hence the RETURN of SNEEZLES). For all of you who wondered and asked "What's a SNEEZLE?" it's not really important what a SNEEZLE is but rather how to get it back. SNEEZLES could have been the Faculty's trademark in the University, a sense of identity for Nurses in the larger schema of things. Sure a variety show may seem insignificant compared to your second year elective, but when the show is over and all is said and done, something remains. An overwhelming sense of pride is embodied in your persona for life — a sense of accomplishment, and that's something no one can ever take away from you.

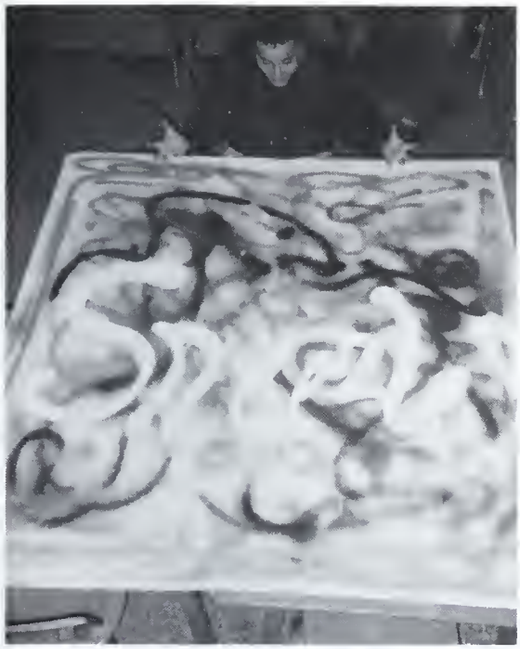

Although SNEEZLES didn't quite make it this year, no one can deny the effects that it had on the Faculty. People in the hallways were getting excited about it's return, posters were hung, actors and dancers rehearsed all in the name of a SNEEZLES.

What did the faculty miss without SNEEZLES? Firstly, it missed skits from a wide spectrum of personalities. More than ever different people were involved, trying to extensify their involvement within the faculty. The faculty also missed fantastic and wonderful skits: Mary and Molly McKenzie — The MeKenzie Nurses, Elizabeth Manley presenting the Nursechenays Ice Dancing team, Jungle Nurses, The Night before Clinical, Two Cigarettes in an Ashtry, and the overall favorite Hell Hath no Fury like a Nurse Scorned!!

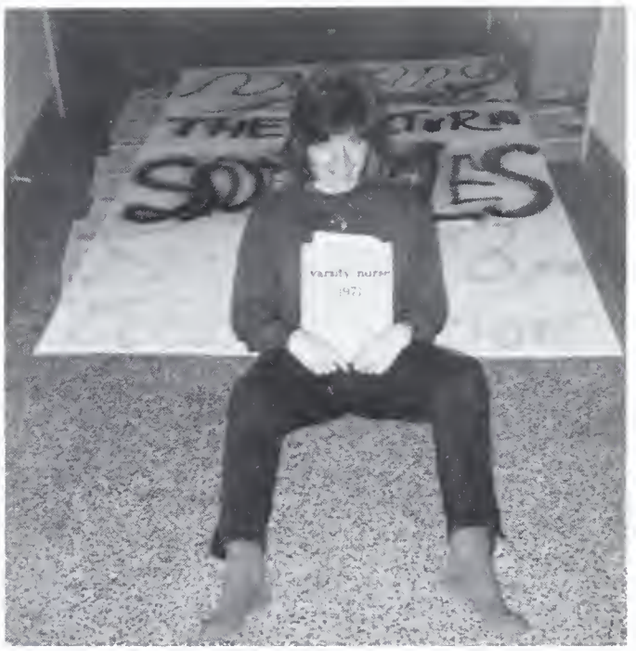

It's really easy to dwell on the past, but let's look toward the future. SNEEZLES has the potential to be whatever we want, all our dreams. It can also be a vehicle to increase awareness of Nursing issues. SNEEZLES can give the Faculty so much, but it is up to us as a whole to make it work.

Thanks to everyone who helped out either with their skits, or their willingness to support SNEEZLES. Special thanks goes to those who volunteered their time in the organization of SNEEZLES — Kevin Backs, Palma Casciato, Leanne Ginty, Maureen Hart, Anne Munro, Dorina Rico, and Linda Scott. Also thanks goes to Dean Pringle and Mickey Bongers for allowing a vehicle of communication between students and staff.

Vince Nardi
Productions Commissioner

Aaah! What a masterpiece!!!

Read all about the beginning of "SNEEZLES" in Varsity Nurse 1971.

Why does everyone take off when it is time to fold the promotion ads???

Not only does Vince have bright ideas but he also has amazing biceps!!!

SNEEZLES' budget sparks up Student Council meetings.

STUDENT COUNCIL — 1989-1990

As I reflect back on my year as president, I have a lot of good memories. Some times were very memorable, such as the support and encouragement I got from all and other times were not so memorable, such as the Wine & Cheese and the Student Council dinner. This was no fault of my own of course. I must say we got a lot accomplished, however, although this was not always easy. There were times I thought we would never agree on anything, and how those meetings dragged on. But we muddled through them and everyone put in a lot of hard work to get things done. I am proud to have represented Student's Council and the Student Body for 1989-90. Best of luck to next year's council. P S My special thanks to Marie of UBC.

Heather Gould
President

The greatest resource in our nursing-school community is us; the people in it. We have an excessive amount and variety of talents, skills, interests and experiences to offer one another; the question is how can we share that which we have? Response — *The Nursing Student Council*: it is a network of students, a group with a myriad of talents and interests, whose primary concern is the creation of a warm, positive and helpful environment here at the faculty. Being a member of this council allowed me to share my goals and interests with others — a healthy and joyful experience. I would like to encourage students to join this network because it is a great way to meet people. Many thanks to all staff and especially the council members for their support.

Susan Carson & Kevin White
Graduation Committee

It was a busy year for the education committee, thanks to all the support and participation from the student body and the faculty. February's Job Fair was well attended by both students and over 30 hospitals and agencies in Toronto. The Faculty Alumni hosted an afternoon reception, in March, which gave students an opportunity to meet with nurses from a spectrum of practice settings. Six students participated in a workshop on "Teaching Multicultural Students" held by the faculty's Teaching-Learning Resources Committee. Once again, CPR courses were held at the end of the year and a display on nursing at U of T was presented at the Faculty of Medicine's Open House.

Two surveys were conducted this year by the education committee. The first helped us to discover what students' interests were in supplemental education and the second was developed to collect some data on students' perceptions of student life at our faculty and at U of T. Survey results were used to plan events and were also submitted to both the Curriculum Committee and the Undergraduate Task Force for the new curriculum.

Financially, it was the first year that the education committee raised more funds than it spent and leaves behind a Balance Sheet in the black. Best of luck to next year's committee and thanks for a great year in "extra-curriculum" education.

Andrew Johnson
Education Director

As Co-Social Director, I was able to be actively involved in the planning and participation of the lighter half of the school curriculum. Instead of asking "Where's the Party?", I would be informing students of who, when and where the party was at. From being involved in Orientation '89, which was wild and wacky, to the more tame aspect of being a Member of the Student Body, I was able to meet and have fun with different people. All in all, it was a very enjoyable experience, especially working with Michelle Gregory. Good luck to next year's Social Director.

Palma Casciato
Co-Social Director

This year our faculty participated at three levels of competition in a number of sports. The faculty placed second overall in Level 3 competition. Basketball, field hockey and volleyball were all areas that the faculty placed in the top four teams. Participation in individual sports increased with more people finding interests in tennis, badminton and squash. Co-ed sports were especially fun with teams in co-ed broomball, basketball and the Powderpuff Tournament. Thanks to all that participated; we hope to see you on the field next year.

Siobhan O'Leary
Athletic Director

OTHER POSITIONS ON STUDENT COUNCIL

Michelle Gregory, Co-Social Director; Lianne Jeffs, Yearbook Editor; Dorina Rico, Yearbook Staff; Elaine Burns, Year III Sports; Heather Robertson & Mona, SHOUT Director; Sue Volaric, Social Year III; Donna Aniol, Year II Class Rep.; Monika Douglas, Social Year II; Vesna Zec, CUNSA Year II.

LETTER FROM THE EDITOR

First of all many thanks to those who helped contribute to the yearbook especially Ramona for the cover design, Dorina and Linda and anyone else who made this yearbook possible. To say it was an easy task would be an understatement as I realized how much work had to be put into this book to truely reflect this past year at school.

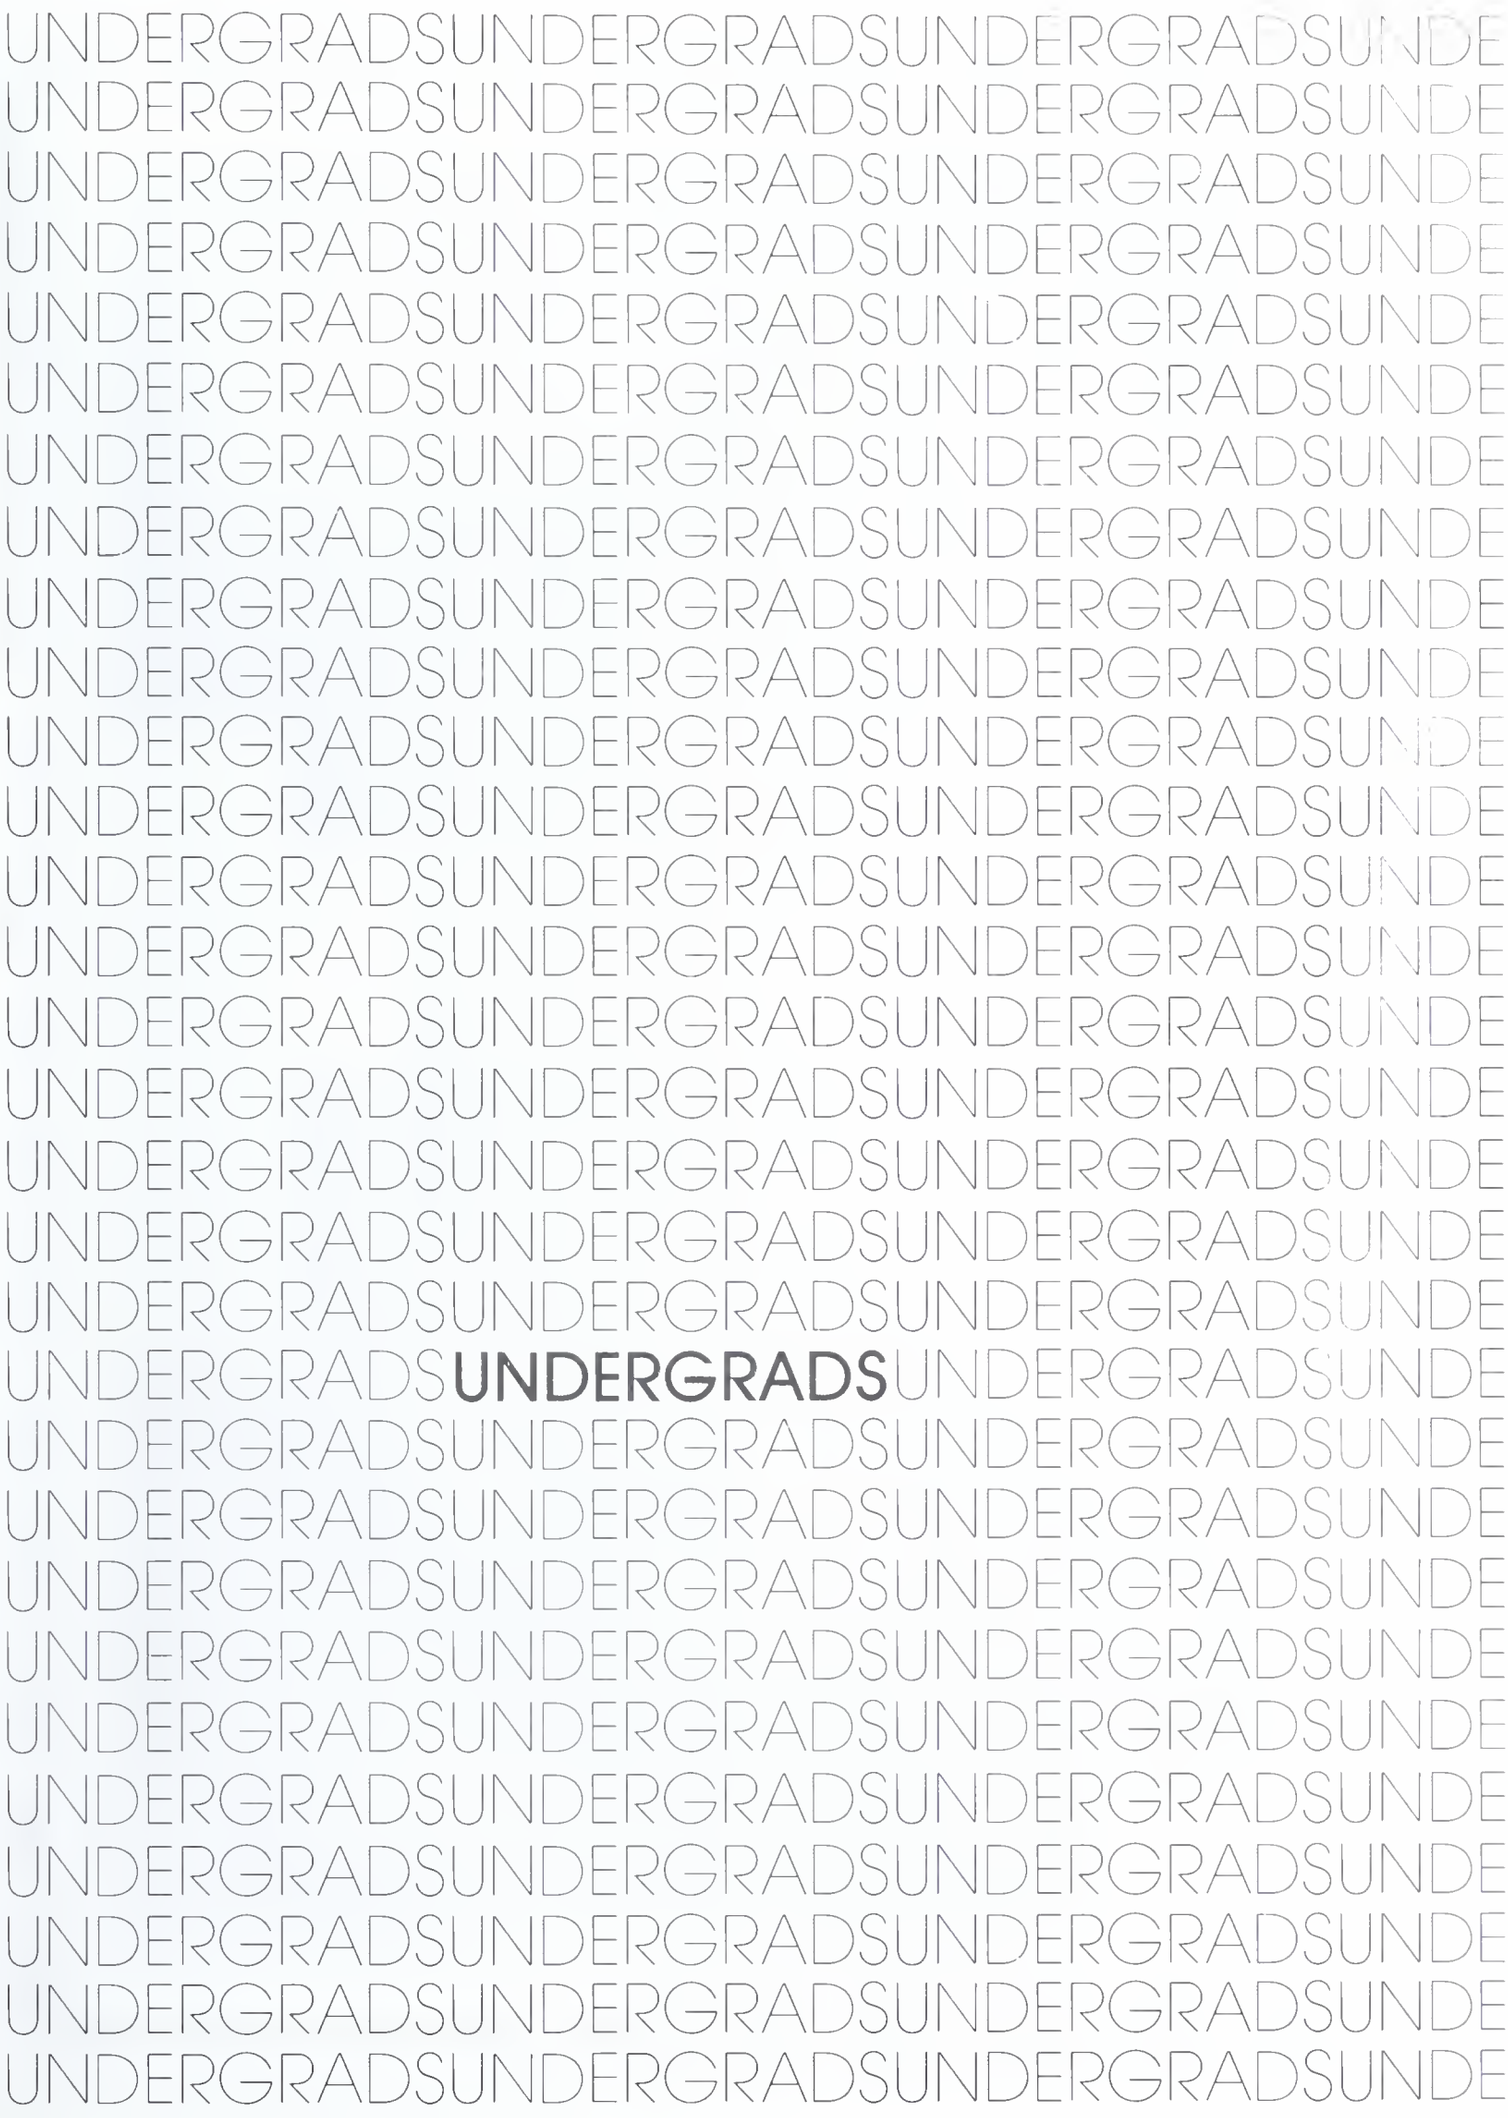

To the graduates of 1990 congratulations and best of luck. You are entering the profession at an optimal time as there is a wide range of opportunities in nursing.

And to the undergrads, myself included, I encourage you to hang in there. Yes at times it seems impossible, but there is a light at the end of the tunnel.

As for the title, isn't The Art of Caring what nursing is all about?

Lianne Jeffs
Yearbook Editor

TRANSCULTURAL NURSING IN THE COMMUNITY — A CHALLENGING CAREER

SPECIAL FEATURE

During my NUR303B clinical experience, I realized the fundamental importance of bringing culture into care. Working as a St. Elizabeth Visiting Nurse (SEVN) is a very exciting career for a person who likes to be challenged. Not only does a SEVN require self-direction and a sixth sense (intuition), she/he also needs to possess a cultural insight. A nurse caring in Toronto's multicultural community needs a sound concept of culture in order to appropriately plan and evaluate patient care. With the rapid increase of people from different cultures, nurses are finding themselves involved in cultural tensions and conflicts because of their problems in *understanding*, especially if ethnocentrism prevails.

During my experience as a SEVN student nurse, I encountered a cultural group that I knew little about. My buddy nurse and I were challenged by a Chinese elderly man (Mr. L.) with a temporary ostomy, and his family that possessed values and beliefs that were foreign to us. When we entered their household, we found Mr. L. downstairs in the basement, wearing a heavy overcoat, boots and a woolen grey hat, lying down on a lawnchair by an electric baseboard heater (outside was very hot and humid). Mr. L. lived with his wife, his married daughter and two grandchildren. Within this family nobody was able to communicate to us in English as to why Mr. L. did not want to leave the basement since he returned home with the ostomy. Mr. L. would touch his legs whenever we pointed to the sunlit stairs leading up to his family. He was able to ambulate without problems and therefore, we did not know why he consistently resisted the upstairs environment. On our third visit (we taught Mr. L. how to care for his ostomy) I visualized the ten year old grandson playing with ants in the backyard. I thought that surely this ten year old boy must know some english since he just returned home from school for his lunch break. After convincing this child on the importance of helping us in communicating with his grandfather, the child ventured down into the basement with me; trailing behind us I heard the grandmother voicing her feelings in Cantonese. I sensed that she did not want the grandson downstairs, however, we desperately needed this child and therefore I found myself toning down the grandmother's voice within my mind.

The grandson helped us to explain to his grandfather (diagnosed with colon cancer) that Tylenol was to be taken only for pain, not everyday. Supposedly, the child said that his grandfather thought Tylenol was for everyday, regardless whether he felt pain or not. Also, the young boy explained to us that the grandfather was not allowed upstairs because "little children should not be around sick grown-ups". At this point, his grandmother who was still hovering over the staircase directed the child to return upstairs.

The whole situation was mystifying to us. Why was the grandfather, upon returning from the hospital, separated from his family? After calling Mr. L.'s doctor, we were told that the family moved the grandfather into the basement because they believed that "cancer" might be contagious and that the children should not be around sick people. The family believed that the ostomy bag was a sign of a contagious sickness. The doctor had numerous talks with the family and supposedly the daughter does help the grandfather up the stairs during the night hours. Anyway, this whole experience allowed me to recognize how difficult it is for nurses to interpret cultural behaviours in a group that she/he knows nothing about.

At the end of my three-week block, it dawned on me that a SEVN is not only a community nurse but also a *transcultural nurse*, whose role is to understand and communicate effectively with patients of different values and beliefs. Therefore, in order for us to start caring transculturally, I decided to include a cut-out sheet with basic vocabulary in three different languages — a starting tool for nurses working in Toronto or nurses who decide to work abroad.

ADVERTISING

a caring idea that grew

At the **Fraser-Burrard Hospital Society** we believe in the premise that two is better than one. That's why we own & operate two separate hospitals, each with its own unique identity. Between them, **The Royal Columbian Hospital** and **Eagle Ridge Hospital**, are committed to offering the best health care possible to the communities we serve. Together we're growing & confronting the day-to-day challenges that are part of offering the kind of efficient and effective health care our patients deserve!

"Proud of our past and part of your future."

Royal Columbian Hospital

If it's fast-paced, leading edge technology you're looking for in your career, then **Royal Columbian Hospital** is sure to please.

This is a modern, 600-bed tertiary care, trauma-oriented, major teaching and referral facility. Located in the Vancouver suburb of New Westminster, B.C., Royal Columbian serves an area of 700,000 people, with the busiest emergency/trauma centre in the province. And that's not all! There are onsite child care facilites and a new *Open Heart Surgery* program to lead the way into the future!

Eagle Ridge Hospital

The newer of the two facilities, **Eagle Ridge Hospital** began operation in 1984. Located 20 minutes from Royal Columbian., **Eagle Ridge Hospital** is a community-oriented, 250-bed facility built on the premise of offering quality health care, in a modern, innovative environment. Medical, Surgical, Emergency, Outpatient and Rehabilitation opportunities are available to those nurses looking for the fulfilling satisfaction that a community approach to nursing provides.

No matter which hospital you choose to call home (in fact some nurses alternate between the two!), you'll find yourself set in some of the most beautiful natural scenery in the world! This is Canada's most breathtaking metropolitan area. The downtown lights of Vancouver are just a short ride away and if you want to relax or exercise, there are miles of ocean beaches, lush parks and world class skiing right on your doorstep!

Contact us for more information on your future with the **Fraser Burrard Hospital Society**. Either way you'll experience an innovative open approach to nursing we're sure you'll find a refreshing change. Please forward your resume to:

The Fraser-Burrard Hospital Society

The Class of **1990** deserves a great future. St. Michael's is dedicated to making it happen.

Our sincere congratulations go out to the University of Toronto's graduating class of 1990. We remember well what it felt like - elation to have finished formal training - anticipation of developing a career - both tinged with a slight concern about making that transition to the working world.

Because we know how you feel, we at St. Michael's go to great lengths in order to make you feel at home, part of the team and productive from day one.

We meet the challenge through a team-oriented approach and a multi-disciplinary work ethic. We back it with continuing education, a computerized environment and the flexibility that encourages you to be closely involved in your own development.

People often tell us there's something special about St. Michael's - we invite you to explore what it is. For further information, please write to: ***Human Resources, St. Michael's Hospital, 30 Bond Street, Toronto, Ontario M5B 1W8***

CENTURIES OF DISCOVERY
PARKE-DAVIS OVER ONE HUNDRED YEARS IN CANADA

PARKE-DAVIS ADVANCES INTO A SECOND CENTURY OF SIGNIFICANT DISCOVERIES

Parke-Davis has grown with Canada sharing pharmaceutical research and development discoveries such as: Adrenalin* (epinephrine HCl), Dilantin* (phenytoin sodium), Benadryl* (diphenhydramine HCl), Zarontin* (ethosuximide), Lopid* (gemfibrozil).

And the future looks even more promising. Parke-Davis is continuing to increase its investment in medical research both in Canada and on a worldwide basis.

We're working hard to find the answers to many of today's medical problems; antitumor agents to help the fight against cancer, cognitive agents to combat Alzheimers disease, antihypertensives and lipid regulators to help prevent cardiovascular disease. Research is currently going on to discover new drugs for schizophrenia, epilepsy, asthma, heart disease and infections.

As a demonstration of our commitment to Canada, we invest eleven and one half cents of every sales dollar and employ eighty-three people in research and development, right here in Canada.

Help us share a better Canada through innovative drug research in our second century of discoveries.

GREAT EXPECTATIONS

You're about to graduate, after years of hard work, late night studying and total dedication. Now, full of anticipation and maybe even a little apprehension about your nursing career, you view the world of nursing with great expectations. And so you should

You're about to learn what paediatric nursing is all about. And Sick Kids is ready to share with you the great expectations and experiences that our graduate nurses of last year still feel today. They'll talk about the caring, the support and the continual learning that have helped them through the first part of their nursing career. And they'll tell you how it feels to see a sick child get well because of the care they've provided.

We'll give you plenty of reasons why Sick Kids would be an excellent place to launch your nursing career. Contact Susan MacGregor at the address below.

NURSING OPPORTUNITIES

Congratulations to the Graduating Class of '90

Join Our Team

North York General Hospital is a 660-bed progressive community health care facility offering a broad range of ambulatory, acute and long term care services. We have always been proud of the excellent nursing care provided to our patients. The Hospital is located at the southeast corner of Leslie Street and Sheppard Avenue, convenient to public transportation and major commuter routes.

The Nursing Department uses a modified version of Henderson's Conceptual Framework. The unit dose drug distribution system is in the process of being established throughout the hospital. At present there are both full and part-time nursing opportunities for New Grads, Registered Nurses and Registered Nursing Assistants.

If you are interested in joining our staff and want more information please call (416) 756-6213 or apply to:

Whitby Psychiatric Hospital

NURSES . . .

Whitby Psychiatric Hospital invites you to specialize in Mental Health Care. You will be a vital member of the multi-disciplinary team, using a wide variety of treatment modalities to care for patients with serious mental disorders.

Whitby Psychiatric Hospital is a 381 bed provincial facility providing specialized acute, tertiary and out-patient psychiatric care. The hospital setting is picturesque, on the north shore of Lake Ontario, 40 km from Toronto; public transit is readily available and housing is booming.

These positions will appeal to BScN graduates who wish to increase their clinical skills; gain supervisory experience and/ or educational duties.

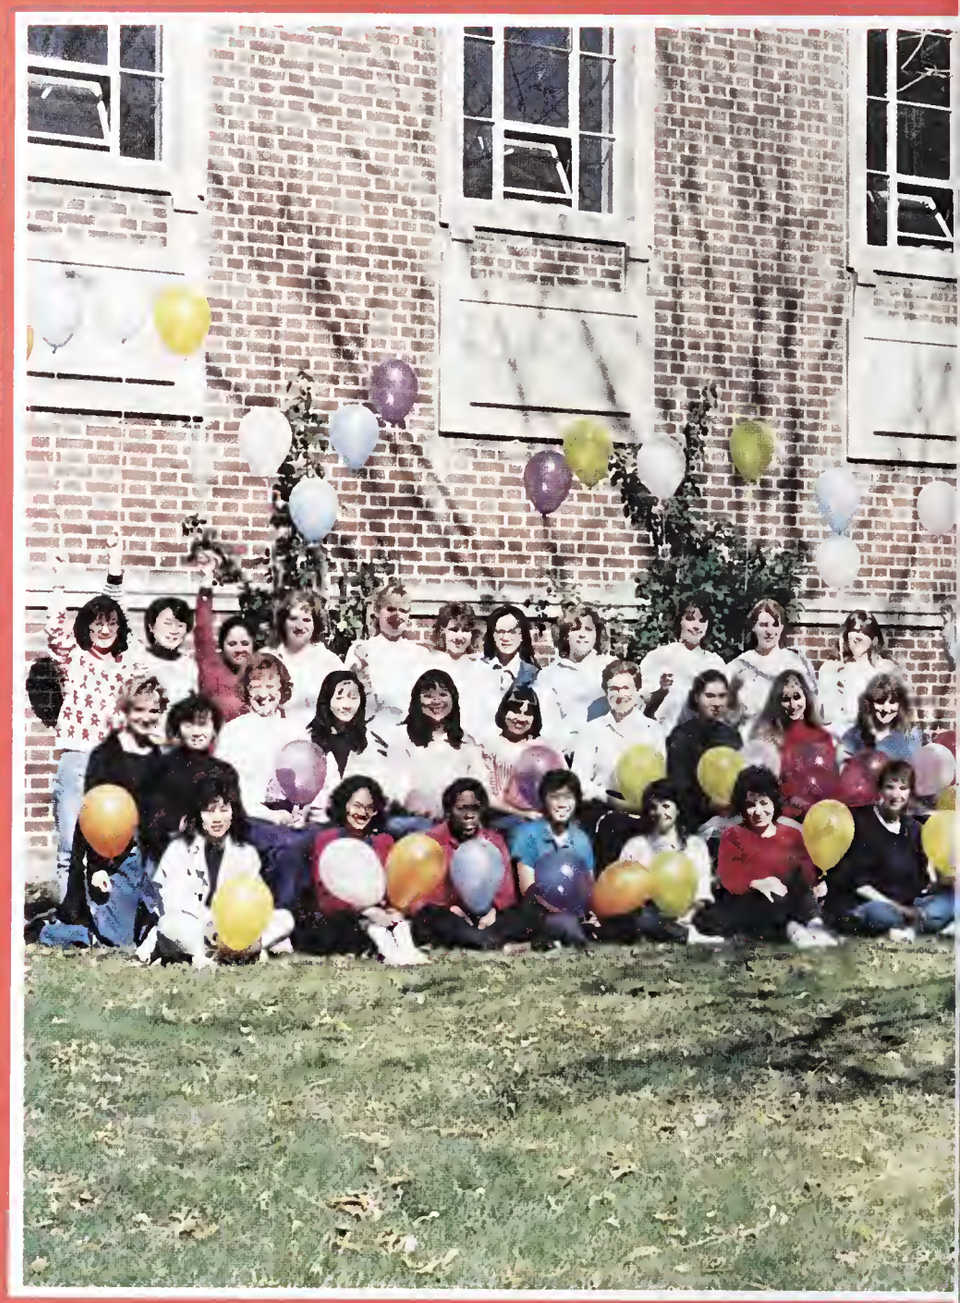

Applicants must be eligible for registration in Ontario under the College of Nurses of Ontario.

We offer competitive salary ranges plus benefits and we are an equal opportunity employer.
